Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This office action is in response to the preliminary amendment of July 17, 2003.

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 1 is objected to because of the following informalities: the use of "it" or "its" throughout the claims can be confusing, specific reference to the elements would be clearer; and, in line 3 after "piston" "rod" should be inserted. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are vague and indefinite because "A *kind* of emulsion pump" is set forth and it is unclear if there are various types of emulsion pumps and which type is being referred to by the claims.

Also there are numerous instances of lack of antecedent basis throughout claim 1. Examples follow:

In line 4 "the lower wall" and "its central through hole",

In lines 5 and 6 "the inner wall",

In line 7 "its upper screw thread",

In line 10 "its upper end",

In line 12 "the inner side lower surface",

In line 14 "the gullet", and

In line 19 "the top lower surface".

Allowable Subject Matter

Claims 1 and 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: the prior art neither disclose nor make obvious an emulsion pump having a piston rod, a cylinder with an upper screw thread and a screw topped sleeve having an inner wall, a lower wall and a screw thread portion as claimed with the relationship of the width of the screw features as set forth in the claim and there being a gap between the contact surfaces of the upper end of the cylinder and the top lower surface of the screw-topped sleeve.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bougamont et al, Van Brocklin and Uehira et al disclose emulsion pumps with vent features.
